I think that social media is like anything because you can use it as a good tool or you can use it to destroy things and hurt other people. Social media can be used in different ways and you have the choice to do what you want with it.

Mr Moore

### Pros

Apps like Twitter are transformational for teachers.

Allow teachers to collaborate in different communities - create digital Personal Learning Networks (PLN).

Share good practice. Copy practice from others.

Stay up to date with research.

### Cons

Time consuming. When teachers are reading too much, they aren't creating or innovating.

Can be addictive. Particularly having social media on personal phone/device.

24 hours a day, 7 days a week. Difficult to 'switch off' from work.

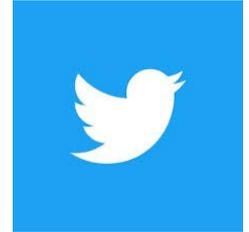

Information overload.

Where is balance between sharing good practice & attention seeking?
